EDUCATION

Bandung Institute of Technology (ITB), Bandung
Computer Science

Aug 2023 – Present

PROFESSIONAL EXPERIENCE

Direktorat Sarana Prasarana & Sistem Informasi ITB, Bandung
Software Engineer (Contract)

Oct 2025 – Present

- Built an end-to-end reporting system for the eFacility web platform, defining report workflows from submission to resolution, implementing status transitions, and enabling admin driven technician assignment to support operational task management.
- Developed a data visualization dashboard for administrative users, presenting reports using category-based aggregations, status distributions, priority levels, and time-based trends to support monitoring, performance evaluation, and data-driven decision making.

Ralat.ind, Bandung

Jul 2025 – Nov 2025

Frontend Engineer (Internship)

- Assisted in building an adaptive learning platform by implementing daily flashcards and progress-tracking systems (streaks, badges, points) as a foundation for future personalized and analytics-driven learning features.
- Collaborated in early-stage product development by translating product vision, rough timelines, and evolving requirements into functional web features, supporting UTBK readiness through iterative improvement of homepage, dashboard, and learning workflows.

Bengkel Code, Bandung

Jun 2025 – Oct 2025

Software Engineer (Freelance)

- Contributed to the development of the MPM UPNVJ organization official website by redesign & modifying all pages and implementing mobile-responsive design.
- Integrated website forms with Google Spreadsheet, built downloadable digital booklet pages, and performed testing including error handling simulations to ensure system reliability.

ARKAVIDIA, Bandung

Nov 2024 – May 2025

Data Science Academya Staff

- Acted as Liaison Officer (LO) for one of 8 participant groups in a 6-day Data Science bootcamp with 24 participants, ensuring effective communication, providing guidance, and addressing participant concerns throughout the project development process.
- Participated as Master of Ceremony during bootcamp sessions, delivering clear announcements and facilitating engaging transitions between sessions involving Data Science expert speakers and mentors.

Comlabs-USDI ITB, Bandung

Oct 2024 – Dec 2024

Computational Thinking Assistant

- Assisting and supervising 2 sessions of 'Berpikir Komputasional' practicum, each with a duration equivalent to 2 credit hours.
- Providing assessments of coding work using the Python application completed by approximately 70 participants across 3 practicum sessions.

PAKANSUPER MARKETPLACE, Bandung
Software Engineer

Aug 2023 – Dec 2023

- Develop an innovative web-based marketplace for farmers and breeders, successfully selected as the only project to represent ITB at the campus fair.
- Oversaw all stages of project execution, strategic planning, team motivation, product design, and marketing resulting in strong team collaboration and high campus recognition for delivering real community impact.
